CISSP Preparation Class

Course Length: 5 days

Course Description

Earning the Certified Information Systems Security Professional (CISSP) certification is the best way to demonstrate your qualifications as an expert professional in the field of information security. Our proven certification preparation program was designed by the author of Que's CISSP Exam Cram 2, Mr. Michael Gregg. This unique class focuses on preparing students for the CISSP exam by means of a high-energy seminar; review of the entire Common Body of Knowledge (CBK), and by covering all the key exam objectives.

Course Objective

This CISSP course helps prepare security professionals to pass the (ISC)2 CISSP exam. The course provides a thorough presentation of the ten domains covered under the (ISC)2 CBK including an understanding of their related concepts, technologies, and theories.

Target Student

The CISSP training program is targeted at professionals with at least 4 years of experience in the information security field or 3 years of experience and a college degree (or equivalent life experience). Please review the ISC2 web site for complete information about CISSP certification rules and requirements (<http://www.isc2.org>).

Performance-Based Objectives

Upon successful completion of this course, students will be prepared to take the CISSP certification exam. The CISSP examination consists of 250 multiple choice questions covering topics such as Access Control Systems, Cryptography, and Security Management Practices and is administered by the International Information Systems.

COMPLETE COMPUTING, INC.
