Microsoft® Office Excel® 2016: Part 3

Course length: 1 day(s)

Course Description
Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Excel 2016, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do.

This course builds off of the foundational and intermediate knowledge presented in the Microsoft® Office Excel® 2016: Part 1 and Part 2 courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates.

This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2016 Exam and the Excel 2016 Expert Exam.

Target Student:
This course is intended for students who wish to gain the foundational understanding of Microsoft Office Excel 2016 that is necessary to create and work with electronic spreadsheets.

Prerequisites
To ensure success, students should have practical, real-world experience creating and analyzing datasets using Excel 2016. Specific tasks students should be able to perform include: creating formulas and using Excel functions; creating, sorting, and filtering datasets and tables; presenting data by using basic charts; creating and working with PivotTables, slicers, and PivotCharts; and customizing the Excel environment. To meet these prerequisites, students can take the following courses, or should possess the equivalent skill level:

- Microsoft® Office Excel® 2016: Part 1
- Microsoft® Office Excel® 2016: Part 2

Course Content
Lesson 1: Working with Multiple Worksheets and Workbooks
  Topic A: Use Links and External References
  Topic B: Use 3-D References
  Topic C: Consolidate Data
Lesson 2: Using Lookup Functions and Formula Auditing  
   **Topic A:** Use Lookup Functions  
   **Topic B:** Trace Cells  
   **Topic C:** Watch and Evaluate Formulas

Lesson 3: Sharing and Protecting Workbooks  
   **Topic A:** Collaborate on a Workbook  
   **Topic B:** Protect Worksheets and Workbooks

Lesson 4: Automating Workbook Functionality  
   **Topic A:** Apply Data Validation  
   **Topic B:** Search for Invalid Data and Formulas with Errors  
   **Topic C:** Work with Macros

Lesson 5: Creating Sparklines and Mapping Data  
   **Topic A:** Create Sparklines  
   **Topic B:** Map Data

Lesson 6: Forecasting Data  
   **Topic A:** Determine Potential Outcomes Using Data Tables  
   **Topic B:** Determine Potential Outcomes Using Scenarios  
   **Topic C:** Use the Goal Seek Feature  
   **Topic D:** Forecasting Data Trends

Appendix A: Microsoft Office Excel 2016 Exam 77-727  
Appendix B: Microsoft Office Excel 2016 Expert Exam 77–728  
Appendix C: Microsoft Excel 2016 Common Keyboard Shortcuts  
Appendix D: Cube Functions  
Appendix E: Importing and Export Data  
Appendix F: Internationalizing Workbooks  
Appendix G: Working with Power Pivot  
Appendix H: Advanced Customization Options  
Appendix I: Working with Forms and Controls
