## Microsoft Office 2013: Transition from Office 2003

*Course length: 1 day(s)*

### Course Description

You've used Office 2003 to create various types of business materials from documents in Microsoft® Word to spreadsheets in Excel® to presentations in PowerPoint®. Perhaps you use Outlook® to manage your calendar, contacts, and email or Access® to manage inventory and trouble tickets.

However you use Office, the fact is the Office suite of applications is the de-facto standard for business productivity software. Each new release of Office builds upon the successes of the previous generations.

This course builds upon the foundational Microsoft® Office 2003 knowledge and skills you've already acquired. It focuses on the enhanced features you'll want to leverage to improve the way you manage, organize, present, and distribute your company's data and information.

You'll explore a variety of enhancements, from Word's ability to edit PDF files, to the new Flash Fill functionality in Excel that dramatically increases the speed at which you can add data to a spreadsheet. You'll discover how the cloud has been deeply integrated into your Office experience and how collaborating with colleagues has never been easier.

The *Microsoft® Office 2013: Transition from Office 2003* course will help you bridge the gap from the version you already know and love to the latest release of Microsoft's flagship productivity suite.

### Course Objectives:

In this course, you will increase your productivity using the new features available in Office 2013 applications.

You will:

- Identify new features in Microsoft Office 2013.
- Work with Microsoft Word 2013.
- Work with Microsoft Excel 2013.
- Work with Microsoft PowerPoint 2013.
- Work with Microsoft Access 2013.
- Work with Microsoft Outlook 2013

### Prerequisites

To ensure your success in this course, you will need to have familiarity with Windows® 8 or 8.1 and the Office 2003 suite of products, including Word, Excel, PowerPoint, Access, and Outlook.
