

Microsoft Word for Office 365 (Desktop or Online): Part 2

Course length: 1 day(s)

Course Description

After you master the basics of using Microsoft® Word for Office 365™ such as creating, editing, and saving documents; navigating through a document; and printing, you're ready to move on to tackling the more advanced features. These features enable you to create complex and professional documents with a consistent look and feel. They also enable you to automate tedious tasks such as preparing a letter to send to every customer of your organization.

Creating professional-looking documents can help you give your organization a competitive edge. Implementing time-saving features such as document templates and automated mailings helps your organization reduce expenses. Mastering these techniques will make you a valued employee in your organization.

Note: Most Office 365 users perform the majority of their daily tasks using the desktop version of the Office software, so that is the focus of this training. The course material will also enable you to access and effectively utilize many web-based resources provided with your Office 365 subscription. Helpful notes throughout the material alert you to cases where the online version of the application may function differently from the primary, desktop version.

Course Objective

In this course, you will learn fundamental Word skills.

You will:

- Organize content using tables and charts.
- Customize formats using styles and themes.
- Insert content using Quick Parts.
- Use templates to automate document formatting.
- Control the flow of a document.
- Simplify and manage long documents.
- Use mail merge to create letters, envelopes, and labels.

Prerequisites

To ensure your success, you should have end-user skills with any current version of Windows®, including being able to start programs, switch between programs, locate saved files, close programs, and access websites using a web browser. In addition, you should be able to navigate and perform common tasks in Word, such as opening, viewing, editing, and saving documents; formatting text and paragraphs; formatting the overall appearance of a page; and creating lists and tables.
